SUMMARY

Junior Flutter Developer, self-taught and self-driven in building cross-platform mobile applications for iOS and Android using Flutter. Strong grasp of clean architecture, state management (Riverpod, Bloc), and modern mobile development practices. Proven ability to translate UI/UX designs into polished, production-ready code and deliver complete projects independently — from personal builds to freelance client work. Fully available for full-time opportunities and focused on professional growth in mobile development.

SKILLS

Tools & Platforms

Git, GitHub, Android Studio, VS Code, Postman, Firebase Console.

State Management & Architecture

Riverpod, Bloc, Provider, Clean Architecture, MVVM, SOLID Principles.

Local Storage

SharedPreferences, Hive.

Mobile Development

Flutter, Dart, Responsive UI, Material Design.

API & Backend Integration

REST API, Dio, JSON Serialization, Firebase (Authentication, Firestore, FCM)

Soft Skills

Problem Solving, Teamwork, Communication, Time Management, Requirement Understanding, Client Communication

PROJECTS

Invesier — Social Trading Platform

App Store [🔗](#) • Google Play [🔗](#)

- Built UI screens in Flutter for a social trading app connecting traders and investors.
- Designed UI for live trading challenges, market updates, and educational sessions.
- Crafted UI/UX flow for social interaction features to support user engagement with trading-related content.
- Ensured consistent design language and smooth navigation across all app screens.

Al Rubban Marine — Boat Maintenance & Service Management Platform

App Store [🔗](#) • Google Play [🔗](#)

- Built UI screens in Flutter for a marine service app that lets boat owners manage boats and request maintenance services.
- Designed UI for scheduling flows (on-site/center-based repairs) and real-time service progress tracking.
- Crafted responsive UI/UX across Android and iOS for a smooth and reliable user experience.
- Maintained consistent UI components and design patterns across all screens.

Lady Driver - Women-Only Ride Sharing Platform [🔗](#)

- Built UI screens in Flutter for a women-only ride-sharing app connecting passengers and drivers.
- Designed UI for booking flows, driver offers, and pickup/drop-off map screens.
- Crafted UI for live trip tracking and safety action screens across the app.

Food Ninja – Hybrid Food & Grocery Platform [🔗](#)

- Developed a hybrid food and grocery delivery application, unifying multiple design references into a single consistent Flutter codebase.
- Implemented Clean Architecture with Riverpod for scalable state management and maintainable codebase.
- Built advanced features including search, filtering, animations, localization, and smooth order flow experience.
- Optimized app performance and ensured smooth navigation across screens.

Bookly – Digital Book Explorer

- Built a book discovery application using Google Books API with real-time search and detailed book previews.
- Implemented Bloc/Cubit state management with MVVM architecture for predictable and scalable app behavior.
- Designed a responsive UI with GoRouter navigation, dependency injection (GetIt), and clean API integration.

Dalel – Historical Explorer

- Developed a full-stack Flutter application for exploring historical civilizations, figures, wars, and artifacts, powered entirely by Firebase.
- Implemented Firebase Authentication and Cloud Firestore for real-time data storage, retrieval, and user management.
- Built a Clean Architecture structure with Bloc/Cubit state management, search functionality, and Easy Localization support.

CERTIFICATES

CS50: Introduction to Computer Science – Harvard University (edX)

- Completed Harvard's CS50, covering algorithms, data structures, and problem-solving fundamentals in C, Python, and SQL.
- Built and debugged multiple projects, strengthening core programming logic used daily in Flutter development.

1 Million Prompters (AI Prompt Engineering Training) – Dubai Future Foundation

- Completed Dubai Future Foundation's Prompt Engineering initiative for AI systems.
- Gained practical experience crafting effective prompts to guide AI models, complementing hands-on development work in Flutter and AI-integrated app features.
