Mohamed Ibrahim Mohamed

Junior Flutter Developer

mohamedibrahimsoftware02@gmail.com | +201204306044 | Mansoura, Egypt | LinkedIn | GitHub

Summary

Junior Flutter Developer with hands-on experience building cross-platform mobile applications for iOS and Android using Flutter and Dart. Skilled in REST API integration, state management using Riverpod and BLoC/Cubit, Clean Architecture, MVVM, and responsive UI development. Experienced in contributing to production applications, implementing UI features, and integrating Firebase services. Familiar with Git, GitHub, and collaborative development workflows. Seeking a Flutter Developer opportunity to contribute to real-world projects and continue growing as a mobile developer.

Experience

Flutter Developer – Mawdooey (Freelance) 09/2026 – 10/2026 | Remote

App Store • Google Play

- Contributed to the development and enhancement of an existing Flutter application published on the Apple App Store and Google Play.
- Implemented UI enhancements, integrated images, and developed an animated dialog to improve the user interface.
- Worked within an existing Flutter codebase while maintaining consistency with the application's design and structure.

Flutter Developer – Al Rubban Marine (Freelance) 11/2025 – 02/2026 | Remote

App Store • Google Play

- Developed the Profile section of a Flutter mobile application for boat maintenance services.
- Implemented profile editing, language selection, light and dark themes, and legal and support pages.
- Developed account-related actions and UI components to support the application's user experience.
- Contributed to a production application published on the Apple App Store and Google Play.

Skills

Mobile Development: Flutter, Dart, Responsive UI & Adaptive Design, Material Design, Animations.
State Management & Architecture: Riverpod, BLoC / Cubit, MVVM, Clean Architecture, SOLID Principles, Design Patterns.
API & Backend Integration: RESTful APIs, Dio, Firebase (Authentication, Firestore).
Local Storage: SharedPreferences, Hive.
Navigation & Routing: GoRouter, AutoRoute
Development Tools: Git, GitHub, Android Studio, Visual Studio Code, Postman

Projects

Invesier – Social Trading Platform

App Store • Google Play

- Contributed to the Flutter UI of a social trading app connecting traders and investors.
- Helped refine and finalize screens for live trading challenges, market updates, and educational sessions.

Lady Driver – Women-Only Ride Sharing Platform

Google Play

- Contributed to the Flutter UI of a women-only ride-sharing app connecting passengers and drivers.
- Helped refine and finalize booking, map, and live trip tracking screens.

Food Ninja – Hybrid Food & Grocery Platform

GitHub

- Built a food and grocery delivery app in Flutter, unifying multiple design references into one consistent codebase.
- Structured the app with Clean Architecture and Riverpod for scalable state management and maintainability.
- Implemented search, filtering, animations, localization, and a complete order flow.

Dalel – Historical Explorer
GitHub

- Built a Flutter app for exploring historical civilizations, figures, wars, and artifacts, with Firebase as the backend.
- Implemented Firebase Authentication and Cloud Firestore for user management and real-time data retrieval.
- Structured the app with Clean Architecture and Bloc/Cubit, and added search and multi-language support using Easy Localization.

Education

Al-Azhar Secondary Education 08/2020 | Mansoura, Egypt
Al-Azhar Institutes

Certifications

CS50x: Introduction to Computer Science – Harvard University (Verify certificate)
1 Million Prompters – Dubai Future Foundation (Verify certificate)
