Mohamed Ibrahim Mohamed

Junior Flutter Developer

mohamedibrahimsoftware02@gmail.com | +201204306044 | Mansoura, Egypt | LinkedIn | GitHub

Summary

Flutter Developer building cross-platform iOS and Android apps with Flutter and Dart. Experienced in Clean Architecture, state management (Riverpod, Bloc), and Firebase/REST API integration. Contributed UI work to client apps. Seeking a full-time Flutter Developer role.

Experience

Flutter Developer – Mawdooey (Freelance) 09/2026 – 10/2026 | Remote

App Store • Google Play

- Contributed to Al Mushaf Al Mawdooey, a Quran app live on the App Store and Google Play, working within an existing client Flutter codebase.
- Implemented UI enhancements including image integration and an animated dialog.

Flutter Developer – Al Rubban Marine (Freelance) 11/2025 – 02/2026 | Remote

App Store • Google Play

- Contributed to Al Rubban Marine, a boat maintenance app live on the App Store and Google Play.
- Developed the Profile section in Flutter: profile editing, language and light/dark theme, legal/support pages, and account actions.

Skills

Mobile Development
Flutter, Dart, Responsive UI & Adaptive Design, Material Design, Custom Widgets & Animations.

State Management & Architecture
Riverpod, BLoC / Cubit, Clean Architecture, MVVM, SOLID Principles, Design Patterns.

API & Backend Integration
RESTful APIs, Dio, Firebase (Authentication, Firestore, Push Notifications).

Local Storage
SharedPreferences, Hive.

Tools & Platforms
Git, GitHub, Android Studio, VS Code, Postman, Firebase Console.

Projects

Invesier – Social Trading Platform

App Store • Google Play

- Contributed to the Flutter UI of a social trading app connecting traders and investors.
- Helped refine and finalize screens for live trading challenges, market updates, and educational sessions.

Lady Driver – Women-Only Ride Sharing Platform

Google Play

- Contributed to the Flutter UI of a women-only ride-sharing app connecting passengers and drivers.
- Helped refine and finalize booking, map, and live trip tracking screens.

Food Ninja – Hybrid Food & Grocery Platform

GitHub

- Built a food and grocery delivery app in Flutter, unifying multiple design references into one consistent codebase.
- Structured the app with Clean Architecture and Riverpod for scalable state management and maintainability.
- Implemented search, filtering, animations, localization, and a complete order flow.

Dalel – Historical Explorer
GitHub

- Built a Flutter app for exploring historical civilizations, figures, wars, and artifacts, with Firebase as the backend.
- Implemented Firebase Authentication and Cloud Firestore for user management and real-time data retrieval.
- Structured the app with Clean Architecture and Bloc/Cubit, and added search and multi-language support using Easy Localization.
